

Lead Generation Specialist – Screening Test

1. What does "MQL" stand for?

- A) Marketing Qualified Lead
- B) Managed Quality Lead
- C) Multi-Query Lead
- D) Market Quantity Lead

2. What does "SQL" stand for in a sales context?

- A) Structured Query Language
- B) Sales Qualified Lead
- C) Sales Quality List
- D) Standard Quota Level

3. Which of these is a common lead qualification framework?

- A) SWOT
- B) BANT
- C) PEST
- D) RACI

4. In BANT, what does the "A" stand for?

- A) Approach
- B) Authority
- C) Analysis
- D) Allocation

5. What is a "cold email"?

- A) An email sent to an existing customer
- B) The first unsolicited outreach email to a prospect with no prior relationship
- C) An automated rejection email
- D) An email sent late at night

6. What's the primary difference between inbound and outbound lead generation?

- A) Inbound is free; outbound always costs money
- B) Inbound attracts leads through content/SEO; outbound proactively reaches out to prospects
- C) Inbound only works on LinkedIn
- D) There is no real difference

7. What is a "lead magnet"?

- A) A tool that removes duplicate leads
- B) A CRM feature
- C) An incentive (ebook, webinar, discount) offered to capture contact info
- D) A type of cold call script

8. Which metric measures the percentage of leads that convert to a next stage?

- A) Churn rate
- B) Conversion rate
- C) Bounce rate
- D) Open rate

9. What does "ICP" stand for in lead gen?

- A) Ideal Customer Profile
- B) Inbound Conversion Path
- C) Internal Contact Plan
- D) Initial Contact Point

10. What's a common purpose of A/B testing in email outreach?

- A) To send emails faster
- B) To compare two versions of an email/subject line to see which performs better
- C) To bypass spam filters
- D) To reduce CRM costs

11. What does "CRM" stand for?

- A) Customer Relationship Management
- B) Contact Record Module
- C) Client Retention Metric
- D) Customer Revenue Model

12. Which of the following is typically tracked as an outreach KPI?

- A) Open rate
- B) Reply rate
- C) Meetings booked
- D) All of the above

13. What is "lead enrichment"?

- A) Deleting inactive leads
- B) Adding additional data (company size, role, industry) to existing lead records
- C) Sending leads a gift
- D) Converting leads into customers instantly

14. What is the purpose of a sales/lead generation funnel?

- A) To track office expenses
- B) To visualize and manage the stages a prospect moves through before becoming a customer
- C) To filter spam emails
- D) To manage employee schedules

15. What does "TOFU, MOFU, BOFU" refer to?

- A) Stages of the marketing/sales funnel (Top, Middle, Bottom of Funnel)
- B) Types of CRM software
- C) Lead scoring categories
- D) Email formatting styles

16. Which platform is most commonly used for B2B social selling and prospecting?

- A) Instagram
- B) LinkedIn
- C) Pinterest
- D) TikTok

17. What is "lead scoring"?

- A) Randomly assigning leads to sales reps
- B) Ranking leads based on likelihood to convert, using behavior and demographic data
- C) Counting the total number of leads generated
- D) A method to delete unqualified leads

18. What's the main risk of poor email list hygiene?

- A) Faster sending speed
- B) Higher bounce rates and potential spam flagging
- C) Better open rates
- D) Lower CRM costs

19. What does "SPF" and "DKIM" relate to in cold email outreach?

- A) Sales performance frameworks
- B) Email authentication protocols that improve deliverability
- C) Lead scoring algorithms
- D) CRM integrations

20. What is a "sequence" or "cadence" in outbound outreach?

- A) A single cold call
- B) A planned series of touchpoints (emails, calls, LinkedIn messages) over time
- C) A CRM report
- D) A type of lead magnet

21. What is "gatekeeper" in the context of cold calling?

- A) A software tool that blocks spam calls
- B) A person (e.g., receptionist/assistant) who controls access to the decision-maker
- C) A CRM security feature
- D) The final approver of a deal

22. Which of the following best describes "personalization" in outreach?

- A) Sending the same generic template to everyone
- B) Tailoring messaging based on the prospect's specific context, role, or pain points
- C) Using emojis in every email
- D) Automating 100% of communication with no human review

23. What does "opt-out" or "unsubscribe" compliance typically relate to?

- A) CRM software licensing
- B) Data privacy/email regulations like CAN-SPAM or GDPR
- C) Sales commission structure
- D) Lead scoring criteria

24. What is a "warm lead"?

- A) A lead who has had no interaction with your brand
- B) A lead who has shown some interest or engagement (e.g., downloaded content, visited pricing page)
- C) A lead assigned by mistake
- D) A lead that has already purchased

25. Which tool type is commonly used to find verified business emails?

- A) Photo editing software
- B) Email finder/verification tools (e.g., Hunter, Apollo, ZoomInfo)
- C) Project management tools
- D) Video conferencing software

26. What's the purpose of a "discovery call"?

- A) To close the deal immediately
- B) To understand the prospect's needs, pain points, and fit before proposing a solution
- C) To send an invoice
- D) To onboard a new customer

27. What does "churn rate" measure?

- A) The rate at which new leads are generated
- B) The rate at which customers stop doing business with a company
- C) The rate of email opens
- D) The rate of successful cold calls

28. In outbound prospecting, what is "spray and pray"?

- A) A highly targeted, personalized outreach method
- B) A low-quality approach of sending mass generic messages without targeting
- C) A CRM automation feature
- D) A lead scoring model

29. What is the role of a Lead Generation Specialist primarily focused on?

- A) Managing company payroll
- B) Identifying, researching, and generating qualified prospects for the sales pipeline
- C) Designing the company website
- D) Handling customer refunds

30. Which of these best indicates a successful lead generation campaign?

- A) High number of emails sent, regardless of replies
- B) High volume of unqualified leads
- C) Strong conversion of leads into qualified opportunities/meetings booked
- D) Number of hours spent on LinkedIn

31. In email deliverability, what does DMARC primarily help prevent?

- A) Slow email sending speeds
- B) Domain spoofing and phishing by verifying sender authenticity
- C) CRM data duplication
- D) Low lead scores

32. What is "multi-threading" in outbound B2B sales?

- A) Sending multiple emails to the same person in one day
- B) Engaging multiple stakeholders within the same target account simultaneously
- C) Running parallel cold call campaigns
- D) Using multiple CRMs for one account

33. What is "intent data" used for in lead generation?

- A) Measuring how many emojis a prospect uses
- B) Identifying prospects actively researching solutions like yours, based on online behavior signals
- C) Scoring the grammar quality of a lead's replies
- D) Tracking internal employee productivity

34. In Account-Based Marketing (ABM), what is a "tiering" strategy?

- A) Segmenting target accounts by value/fit to customize outreach intensity and personalization
- B) Ranking sales reps by performance
- C) Structuring email subject lines by urgency
- D) A pricing model for SaaS products

35. What's the key difference between "predictive lead scoring" and traditional (rule-based) lead scoring?

- A) Predictive scoring uses AI/ML on historical conversion data; rule-based relies on manually assigned point values
- B) They are identical, just different names
- C) Rule-based scoring is always more accurate
- D) Predictive scoring only works for outbound, not inbound

36. What does a high "bounce rate" combined with a low "sender reputation score" typically lead to?

- A) Improved inbox placement
- B) Emails increasingly routed to spam folders, hurting overall domain deliverability
- C) Higher lead scores
- D) No measurable impact

37. In attribution modeling, what does "multi-touch attribution" attempt to solve?

- A) Determining which single touchpoint gets 100% credit for a conversion
- B) Fairly distributing credit for a conversion across multiple touchpoints in the buyer journey
- C) Reducing the number of touchpoints needed to convert
- D) Automating cold call dialing

38. What is "lead waterfall enrichment"?

- A) Sending leads through multiple sales reps in sequence
- B) Using a sequential stack of data providers/tools so if one fails to find data, the next is queried, maximizing enrichment coverage
- C) A funnel visualization technique only
- D) A method to disqualify leads automatically

39. If your CAC (Customer Acquisition Cost) is rising while LTV (Lifetime Value) stays flat, what does this most likely signal?

- A) Lead generation efficiency and/or targeting quality may be declining
- B) The sales team is over-performing
- C) Marketing budget should be doubled immediately
- D) No action is needed since LTV matters more

40. A prospect opens your cold email 5 times but never replies or clicks a link. What's the most likely appropriate next step?

- A) Immediately mark them as not interested and remove from the list
- B) Stop all outreach since they're clearly not engaged
- C) Treat it as a warm signal and follow up with a different angle, format, or CTA
- D) Send the exact same email again immediately
